HOW TO FIND FRAME NUMBERS

1. USE FRAME MODEL APPLICATION CHART

Truck models are listed alphabetically beginning on page 3. Use the side rail type (see illustrations on page 2) and "Remarks" to select a frame for the wheelbase desired. Read all explanatory notes carefully as frame modification may be necessary.

2. USE MEASUREMENTS AND PIERCED HOLE

- a. Determine the Side Rail Type (see illustration on page 2).
- b. Locate side rail pierced hole to determine Steel Type.
- c. Measure dimensions A to H and refer to Identification Chart on page 3 to determine frame section modulus ●.
- d. Refer to Model Application Chart beginning on page 3 to locate frame required. Explanatory notes will advise if further modification is necessary.

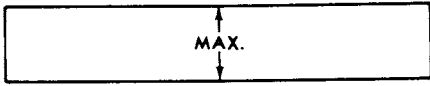

3. USE SECTION MODULUS ●

- a. Frames can be identified by the section modulus and P.S.I. which are shown in the Truck Data Book.
- b. Because of service substitutions, the section modulus of the service frame may be higher than that of the original frame.
- c. Section modulus is also shown in the Model Application Chart beginning on page 3 to aid in frame selection.

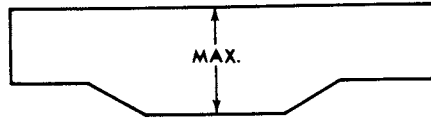

● "Frame section modulus" is the engineering term that indicates, for comparative purposes, the relative of two or more frames of the same supported length, shape and material. All other things being equal, the frame with the largest section modulus will have the greatest strength and stiffness, i.e., the ability to more effectively resist sagging under full loads. It takes into account frame depth, flange width and material thickness. "P.S.I." designates pounds of yield strength per square inch.

5025-37 CROSSMEMBER (FRAME)

CROSSMEMBER APPLICATION

How to find the Part Number of a Crossmember for a 1973/79 frame

1. Find the truck model in the (alphabetical) Model Application Chart which starts below.
2. Find the Crossmember Parts Lists Number which pertains to your unit.
3. Turn to the Parts List (following Application Chart) and find the Crossmember needed.

| YEAR | MODEL | REMARKS | PARTS LIST NO. |
|-----------------|-------------------|---------|----------------|
| B SERIES | | | |
| 73/77 | B500 | | 1 |
| E SERIES | | | |

EXHAUST SYSTEMS MODEL APPLICATION

How to find the part number for a component part of a 1973/ exhaust system

1. Find the truck model in the (Alphabetical) Model Application Chart which starts below.
2. Find the Exhaust Parts List Number which pertains to your unit.
3. Turn to the Parts List (following application chart) and find the component needed.

(PARTS are LISTED from FRONT to REAR)

(. . OR . .)

(BOTTOM to TOP of the EXHAUST SYSTEM)

EXAMPLE— To find a muffler for a 1973 P500 with 300 gas engine and 154" W/B, look first in the (Alphabetical Model Application Chart for P500. Next, find "G" for "gas engine", "300" for 300 C.I.D. and "154" for the wheelbase listed under model P500. Parts List 6 shows exhaust system parts for the model. Turn to Parts List 6 and find part number C9TZ 5230-A for the muffler.

HOW TO FIND A FRONT SPRING PART NUMBER

A. COIL SPRINGS

1. Use the Model Application Chart
 - a. Determine the year, model and G.V.W. of the truck. (G.V.W. can be found on the vehicle warranty plate).
 - b. Determine the wire diameter and/or color coding of both front springs.
 - c. Refer to the Model Application Chart (starting on page 5 of this section) to determine which spring set is installed and the corresponding service part numbers.
 - d. If a spring replacement is required, order the correct spring as shown in the vehicle spring set.
 - e. If a higher capacity spring set is required, order the springs shown with the next higher rating at the ground. Do not install higher capacity spring sets on F350 or Econoline Club Wagon vehicles.
2. Use the Front Spring Cross-Reference Chart
 - a. When a production identification tag (located on the third coil from the bottom) or a stamping number is available, for quick reference of service part numbers refer to the Front Spring Cross-Reference Chart which follows.

B. LEAF SPRINGS

1. Use the Spring Identification Marking
 - a. Find the stamped number which appears on the spring.
 - b. Refer to the Cross-Reference Chart starting (below) to determine the correct service part number.
 - c. After locating a service part number, refer to group 5313 for available leaves.
 - d. The identification marking also appears in the Model Application Chart (on page 5).
2. Use the Front Spring and U-Bolt Model Application Chart
 - a. Determine the year and model of the truck. (In addition, it may be necessary to know the number of leaves or the spring identification marking).
 - b. Refer to the Model Application Chart (starting on page 5 of this section) to determine the correct service part number for the spring and u-bolt.
 - c. After locating a service part number, refer to group 5313 for available spring leaves.
3. Use the Size Chart
 - a. Refer to the size chart and determine the correct service part number by using the spring "type" and dimensions shown.
 - b. After locating a service part number, refer to group 5313 for available leaves.

C. SPRING RATING

They are (1) rating at the pad, and (2) rating at the ground. Both ratings are expressed in pounds.

(Rating at Pad:) This figure represents the amount of weight above the pad which can actually be supported by the springs. This incl. the chassis, body and payload weights.

(Rating at Ground:) This figure incl. the rating at pad plus the weight of components between the spring pad and ground. These components incl. axle, brakes, tires and wheels.

1973/79
TRUCK SERIES 100/500

5560 SPRING ASSY. (REAR)

HOW TO FIND A REAR SPRING PART NUMBER

1. USE THE SPRING STAMPING NUMBER

- a. Find the stamped number which appears on the spring.
- b. Refer to the Rear Spring Cross Reference Chart (below) to determine the correct service part number.
- c. After locating a service part number, refer to group 5563 for available leaves.

2. USE THE REAR SPRING and U-BOLT MODEL APPLICATION CHART

- a. Determine the year and model of the truck.
(In addition, it may be necessary to know the number of leaves, axle capacity, and rear axle type.)
- b. Refer to the Model Application Chart to determine the correct service part number for the spring and U-bolt.
- c. After locating a service part number, refer to group 5563 for available leaves.
- d. Spring Rating
There are two methods of describing spring ratings currently used in the trucking industry. They are (1) rating at the pad, and (2) rating at the ground. Both ratings are expressed in pounds.
(RATING AT PAD) This figure represents the amount of weight above the pad which can actually be supported by the springs. This includes the chassis, body and payload weight.
(RATING AT GROUND) This figure includes the rating at pad plus the weight of components between the spring pad and ground. These components include axle, tires and wheels.

3. USE THE REAR SPRING SIZE CHART

- a. Refer to the dimension chart (following the Application Chart) and determine the correct service part number by using the spring "type" and dimensions shown.
- b. After locating a service part number, refer to group 5563 for available leaves.

HOW TO FIND ENGINE PARTS

1. IF THE ENGINE HAS AN ENGINE IDENTIFICATION TAG:

- a. See the explanation on page 2 as to where the tag is located and the use of "Change Level"
- b. Locate the engine cubic inch displacement (C.I.D.) shown on the engine tag.
- c. Use the engine C.I.D. and the Engine Parts List Index (on page 4) to find the engine parts list required

EXAMPLE: If the Engine Identification Tag shows engine C.I.D. to be 302, then the Engine Parts List Index shows that parts for that engine are listed in Parts List Section 60.2.

2. IF THE VEHICLE SERIAL NUMBER IS KNOWN:

- a. Determine the engine cubic inch displacement (C.I.D.) from the General Information Section of this catalog, using the fourth character of the vehicle serial number.
- b. Use the engine C.I.D. and the Engine Parts List Index (on page 4) to find the engine parts list required.

EXAMPLE: A 1973 F350 model with serial prefix F35H has a 390 C.I.D. engine, as shown for engine code "H" in the General Information Section. The Engine Parts List Index (Section 60 page 4) shows parts for this engine are listed in Parts List Section 60.4.

3. IF THE ENGINE CUBIC INCH DISPLACEMENT (C.I.D.) IS KNOWN, USE THE ENGINE PARTS LIST INDEX (SEC. 60, PAGE 4) TO FIND THE CORRECT ENGINE PARTS LIST SECTION.

The following methods can be used to identify the 351 engines.

| <u>Item</u> | <u>351W</u> | <u>351C & M</u> |
|---|---|--|
| Number of bolts attaching valve cover on exhaust manifold side. | 3 | 4 |
| Type of Front Cover. | Bolted to Cylinder Block. | Cast as part of Cylinder Block. |
| Thermostat Housing | Bolts horizontal and mounts to intake manifold | Bolts vertical and mounts to front cover. |
| Fuel Pump | Attaching Bolts side by side (horizontal plane) | Attaching Bolts one above the other (vertical plane) |

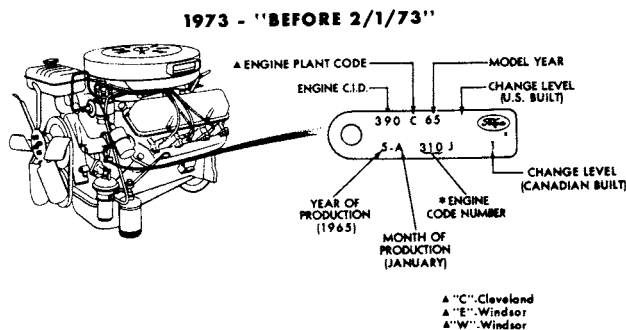

1973/79 TRUCK SERIES 100/500

ENGINE IDENTIFICATION TAG

IN ALL INQUIRES ALWAYS FURNISH THE COMPLETE TAG IDENTIFICATION INFORMATION

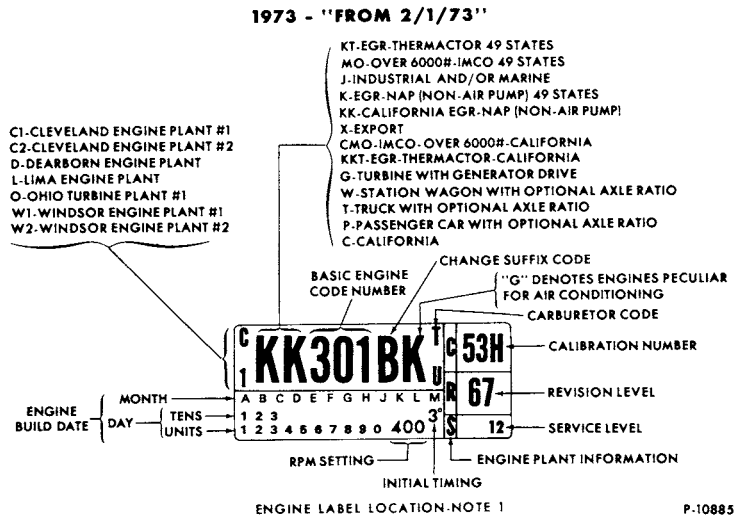

All engines for 1973/ include an engine identification tag. This tag describes C.I.D., model year, year and month of production, change level number and engine calibration information. The catalog uses the change level number in the same manner as date restriction information is presently used. The change level number is advanced only when a replacing part or assembly being introduced and the old part or assembly it replaces are not completely interchangeable. All engine code numbers consists of a basic number, a suffix and in some cases a prefix. Generally the basic number is adequate for engine identification, if additional information is needed the prefix or suffix is included. These Engine Code Numbers and their designations are listed in the Engine Identification Chart which follows.

1973 - "BEFORE 2/1/73"

*Except when indicated in the chart below prefixes and suffixes are for Ford Motor Company use only and do not affect engine identification.

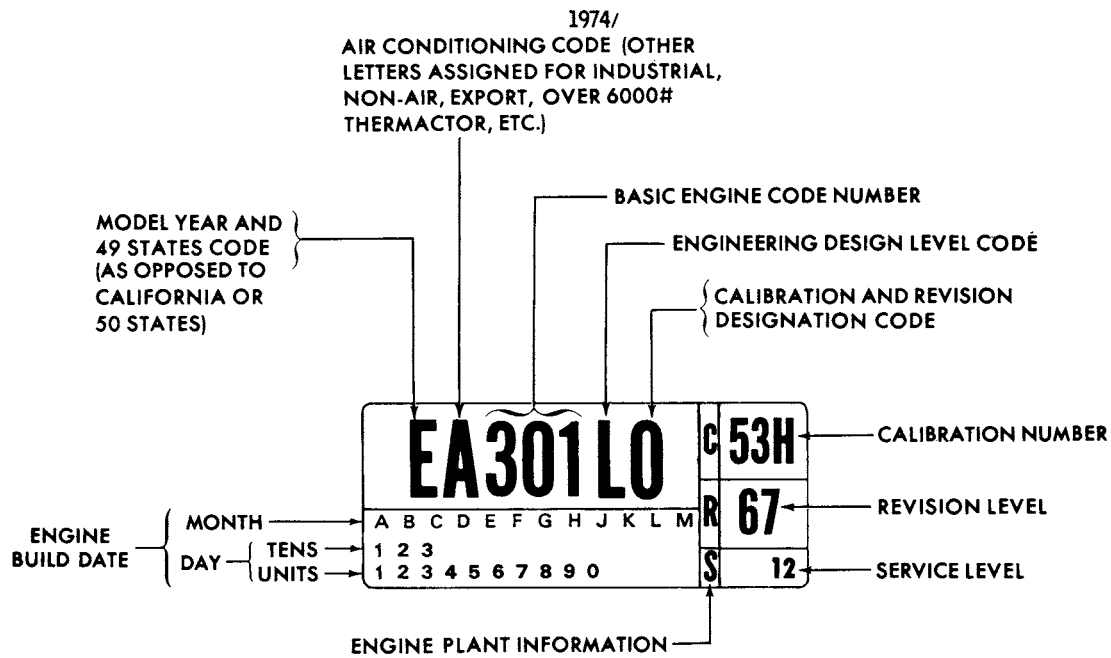

1973/79
TRUCK SERIES 100/500

NOTE 1 - New label (decal) installations will be made as follows:

| ENGINE TYPE | LOCATION |
|---|--------------------------------------|
| 6 Cylinder 240, 300 L/D | Front of Rocker Cover |
| 8 Cylinder 302, 330, 351, 360, 390, 460 | Front of the Right Hand Rocker Cover |

TRUCK SERIES 100/500

PULLEY IDENTIFICATION CHART

The purpose of this guide is to help determine service part numbers for crankshaft pulleys. Pulleys are identified with an engineering part number. Find the engineering number in the "Identification" column then order the number listed in the "Service Part Number" column. In some instances the service part number will have more sheaves than the original pulley, this is done to reduce the complexity of service parts.

PULLEY IDENTIFICATION CHART

| IDENTIFICATION | PART NUMBER | IDENTIFICATION | PART NUMBER |
|----------------|----------------|----------------|----------------|
| 172 | D2AZ 6A312-D | C9SE 6312-B | C9SZ 6A312-A |
| 181 | C9RZ 6A312-A | C9TE 6312-A | C9TZ 6A312-A |
| 190 | D2AZ 6A312-C | C9TE 6312-B | C8AZ 6A312-D |

HOW TO IDENTIFY TRANSMISSION PARTS

- 1. USE THE WARRANTY PLATE CODE:**
 - a. The transmissions are identified by a code on the vehicle Warranty Plate.
 - b. Refer to the General Information Section (under Warranty Plate Transmission Codes) to identify the transmission type and model.
 - c. Refer to the Model Application Chart (starting on page 7) to find the Parts List number, or Illustration Section and Page number.
 - d. Turn to the Parts List and select the component part desired.

- 2. USE THE TRANSMISSION CASE MARKING:**
 - a. Find a painted marking on the transmission case.
 - b. Refer to the Transmission Identification Chart (starting on page 3) to find the Parts List number, or Illustration Section and Page number.
 - c. Turn to the Parts List and select the component part desired.

- 3. USE THE TRANSMISSION IDENTIFICATION TAG:**
 - a. Find an identification tag or plate on the transmission case. (See page 2 for illustrations showing locations)
 - b. Refer to the Transmission Identification Chart (starting on page 3) to find the Parts List number, or Illustration Section and Page number.
 - c. Turn to the Parts List and select the component part desired. (If the transmission case is replaced, transfer the tag to the new case so that identification will not be lost.)

- 4. USE THE MANUFACTURER'S NAME and MODEL NUMBER**
 - a. Refer to the Model Application Chart (starting on page 7) to find the Parts List number for the model – example: A 1973/B500 truck with New Process Model 435 identified 10395 uses Parts List number 70.6A.
 - b. Turn to the Parts List and select the component part desired.

- 5. USE THE TRUCK YEAR and MODEL:**
 - a. Refer to the Model Application Chart (starting on page 7) to find the Parts List number or Illustration Section and Page number for the truck model (The chart is arranged by model year. Within each model year, it is arranged by Truck Series.)
 - b. Turn to the Parts List and select the component part desired.

TRANSMISSION PARTS LIST INDEX

Parts lists are grouped by type and number of speeds and each group of related transmission parts lists is shown in a separate section. The section number can readily be identified with the transmission parts lists numbers as shown in the following example:

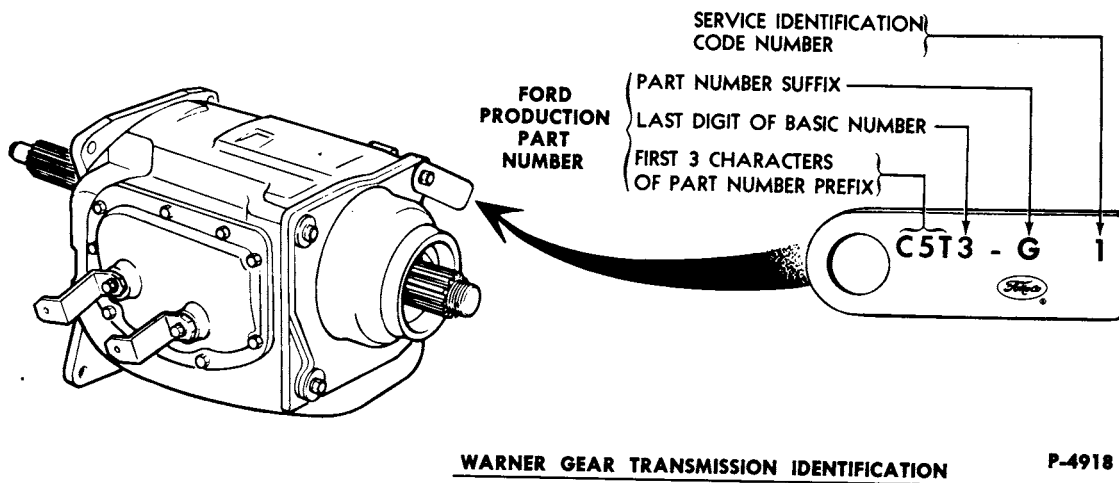

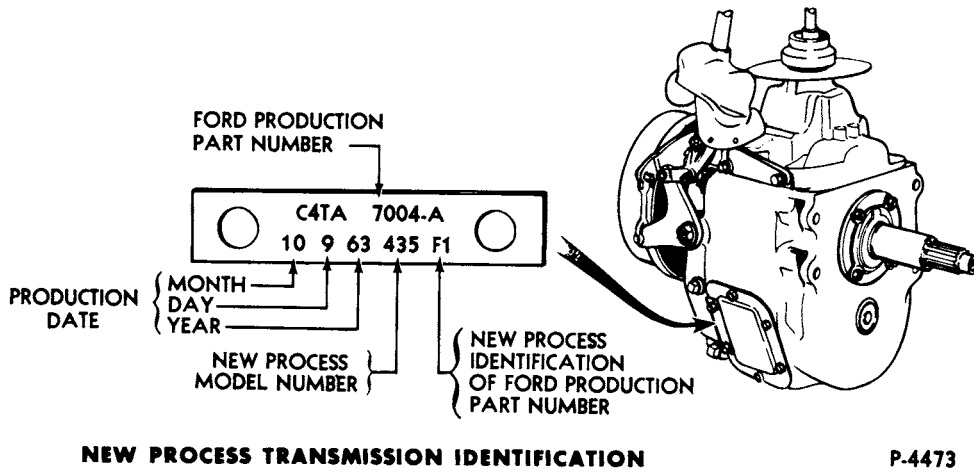

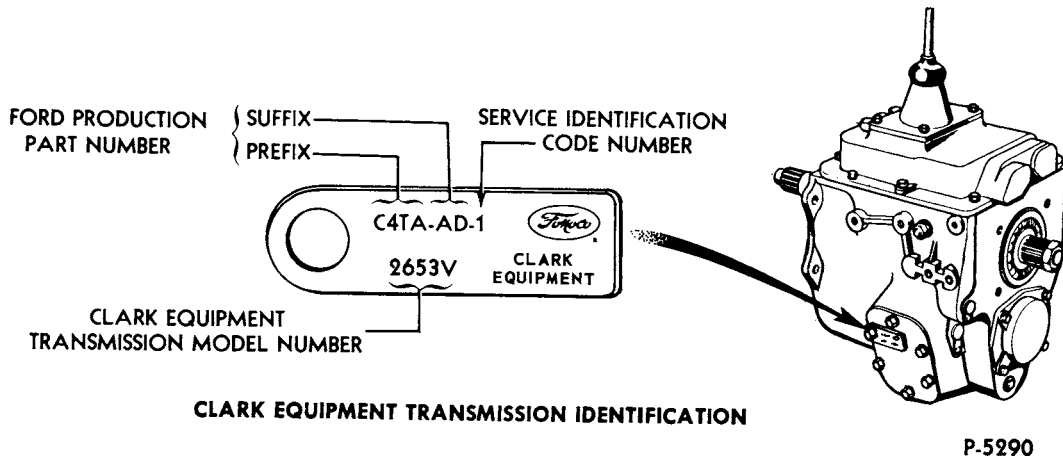

| TRANSMISSION TYPE | NUMBER OF SPEEDS | PARTS LIST NUMBER | TRANSMISSION SECTION NO. |
|-----------------------------|------------------|-------------------|--------------------------|
| Clark | 5 | 9 | 70.9 |
| Dana (Spicer) transfer case | | 17 | 70.17 |
| Ford | 3 | 1 | 70.1 |
| New Process | 4 | 6 | 70.6 |
| New Process | 5 | 8 | 70.8 |
| New Process transfer case | | 17 | 70.17 |
| Warner | 3 | 2 | 70.2 |
| Warner | 4 | 7 | 70.7 |
| Ford | 4/S-O/D | 10 | 70.10 |

Kit part numbers are shown in their respective parts lists. A listing of the components for each kit is shown in Section 70A.

Section 70.1 thru 70.17 and 70A follow Section 70. Immediately following Section 70A, the Ford basic groups are continued in Section 71.

Parts lists are also provided for the 4/W/D transfer case. Data for identifying the 4/W/D transfer case is included in the Transmission Identification Chart following the main transmission listing for the affected model year.

TRANSMISSION KIT PARTS LIST

Instructions for identifying Transmission Assemblies and their related Parts List Numbers are shown on Page 1 of Section 70.

Kit part numbers are included in their appropriate parts lists in Section 70.1 and up.

Included in this section is a listing of components for each kit.

Parts Lists for new kits will be added at the end of this section, irrespective of part number.

Always refer to the Index below for page numbers on which kit components are listed.

1973/79 TRUCK SERIES 100/500

8005 RADIATOR

RADIATOR CROSS REFERENCE GUIDE

A To use this guide:

1. Find the identification marking on radiator top tank or the side mounting bracket.
2. Locate this number in the identification column below.
3. Read across to next column to right to find the service number.

B If the radiator identification is not known, the pages following this guide has radiator part numbers arranged in the following order:

- | | |
|-----------------|----------------------------|
| 1. Truck Series | 3. Number of cylinders |
| 2. Model years | 4. Cubic inch displacement |

8260 HOSE (RADIATOR)

P-4189

RADIATOR HOSE LOCATIONS (TYPICAL)

CUT POINT – Many new molded hoses are designed for multiple applications. Cut-off instructions to fit specified applications are provided with the affected hoses. Appropriate cut-off marks (A,B,C) are imprinted on the cuff of the hose. The cut-off point is shown on the application charts which follow.

HOSE USAGE– Where more than one upper or lower hose is used, see the Location column to find the hose used from pipe-to-radiator (R), pipe-to-engine (E), or oil cooler (O).

Motorcraft numbers as they appear in the model application chart which follows can be used to determine diameter and length of the hose as explained below.

**FLEXIBLE
RADIATOR HOSE**

FIRST LETTER PREFIX:
SECOND LETTER PREFIX:

K – Designates the hose line in all cases.
A – Designates 1 1/4" inside diameter at end opening.
B – Designates 1 1/2" inside diameter at end opening.
C – Designates 1 3/4" inside diameter at end opening.
D – Designates 2" inside diameter at end opening.

NUMBERS: (There must always be a three digit numeral). First two digits designate the amount of full inches of hose length. Third digit designates the remaining fraction of an inch (expressed in eights of an inch) of hose length.

EXAMPLE: KAB-194-Flexible radiator hose having 1 1/4" inside diameter at one end and a 1 1/2" inside diameter at the other end opening and a hose length of 19 1/2".
KC-092-Flexible radiator hose having 1 3/4" end opening inside diameter at both ends and a hose length of 9 1/4".

**MOLDED
RADIATOR HOSE**

FIRST LETTER PREFIX:
SECOND and THIRD LETTER PREFIXES:

K – Designates the hose line in all cases.
M – Designates the molded curved type hose.
S – Designates the molded straight type hose.

NUMBERS: Sequential numbering system beginning with the numeral "1".

EXAMPLE: KM-174-Motorcraft moulded curved radiator hose.
KS-7-Motorcraft moulded straight radiator hose.

8620 BELT (DRIVE)

DRIVE BELTS

HOW TO IDENTIFY FAN BELTS

1. By size and length — the Motorcraft Part Number allows you to determine belt size as explained below.

FIRST LETTER PREFIX: J — Designates the V-belt line in all cases

| SECOND LETTER PREFIX: | Designates | Top width of belt | Designates | Top width of belt |
|------------------------------|-------------------|--------------------------|-------------------|--------------------------|
| | A | 13/32" | G | 7/8" |
| | B | 15/32" | H | 1/4" |
| | C | 1/2" | M | 19/32" |
| | D | 5/8" | P | 23/32" |
| | E | 11/16" | R | 17/32" |
| | F | 3/4" | | |

NUMBERS: (There must always be a three digit numeral)

First two digits designate the amount of whole inches of outside circumference of the belt.
Third digit designates the remaining fraction of an inch (expressed in eighths of an inch) of outside circumference of the belt

LETTER SUFFIXES: Suffixes will designate special types of V-belts—
C — for cog belts, L — for laminated belts

EXAMPLES: *JB-493-L — Laminated belt with 15/32" top width and 49 3/8" outside circumference
*JF-535-C — Cog belt with 3/4" top width and 53 5/8" outside circumference

2. By identification marking — refer to following chart
3. By year, model and application — refer to listing following the identification chart

BELT IDENTIFICATION MARKING TO SERVICE PART NUMBER GUIDE

The purpose of this guide is to help find service part numbers for fan belts. Belts are identified with a marking on the outer (wide) surface of the belt. Although the identification marking and service part number may be the same in some instances, this is not generally true. Find the belt marking in the "Belt Identification Marking" column, then order the number listed in the "Service Part Number" column. Following the guide chart, belt part numbers are listed by model year to help find service part numbers when the belt marking is not known.

9D448 VALVE ASSY. (INTEGRAL EXHAUST GAS RECIRCULATION AND BACK PRESSURE CONTROL)
Also refer to groups 9F452,9D475

- Check the EGR valve, taken from the vehicle, for an identification part number.
- Refer to the Identification Chart below.
- Find the EGR valve identification part number (sequenced numerically) and find the service part number in the adjacent column.

For example:

The service part number for EGR valve identified D7TE 9D448-B1A, D7TE 9D448-B2A or D7TE 9D448-B3A is D7TZ 9D448-B.

1973/79
TRUCK SERIES 100/500

9D448 VALVE ASSY. (INTEGRAL EXHAUST GAS RECIRCULATION AND BACK PRESSURE CONTROL)
Also refer to groups 9F452,9D475

HOW TO FIND EGR VALVES

To select the correct EGR valve the following information must be known and utilized.

- Year
- Model (F100,F150,F250, etc.)
- Engine (6 cyl. 4.9L-300 C.I.D., 8 cyl. 5.0L-302 C.I.D., etc.)
- Transmission (manual, automatic, etc.)
- Other factors (California, hi-altitude, etc.)
- In some cases, more than one service EGR valve may be specified in the catalog based on the above information. In these cases the identification part number shown on the EGR valve is also required.

For example:

If an EGR valve is required for a 1977 F100 with an 8 cyl. 5.0L (302 C.I.D.) engine, automatic transmission used with California emission.

- Refer to 1977 F100
- Read down to find "F100-A/T-Calif. emission 8 (cyl.) 302 (C.I.D.)"

The service part numbers listed for this application are D7TZ 9D448-B and D7TZ 9D448-N. Therefore, to select the correct service part number, the identification part number shown on EGR valve taken from the vehicle, must be used.

If the EGR identification is D7TE 9D448-B1A, D7TE 9D448-B2A or D7TE 9D448-B3A the service part number is D7TZ 9D448-B. If the EGR identification is D7TE 9D448-N1A, D7TE 9D448-N2A or D7TE 9D448-N3A the service part number is D7TZ 9D448-N.

9F452 VALVE ASSY. (EXHAUST GAS RECIRCULATING BACK PRESSURE)—Also refer to groups 9D448,9D475

HOW TO FIND EGR VALVES

To select the correct EGR valve the following information must be known and utilized.

- Year
- Model (F100,F150,F250,etc.)
- Engine (6 cyl. 4.9L-300 C.I.D., 8 cyl. 5.0L-302 C.I.D., etc.)
- Transmission (manual, automatic, etc.)
- Other factors (California, hi-altitude, etc.)
- In some cases, more than one service EGR valve may be specified in the catalog based on the above information. In these cases the identification part number shown on the EGR valve is also required.

For example:

If an EGR valve is required for a 1976 F100 with an 6 cyl. 4.9L (300 C.I.D.) engine, manual transmission.

- Refer to 1976 F100
- Read down to find F100-M/T 6 (cyl.) 300 (C.I.D.).

The service part numbers listed for this application are D6TZ 9F452-E and D6TZ 9F452-F. Therefore, to select the correct service part number, the identification part number shown on the EGR valve taken from the vehicle, must be used.

If the EGR identification is D6TZ 9F452-EA the service part number is D6TZ 9F452-E. If the EGR identification is D6TE 9F452-FA the service part number is D6TZ 9F452-F.

1973/79 TRUCK SERIES 100/500

9D473 VALVE ASSY. (EXHAUST GAS RECIRCULATION CONTROL)

To select the correct EGR valve by knowing the identification number only:

- Check the EGR valve, taken from the vehicle, for an identification part number.
- Refer to the Identification Chart below.
- Find the EGR valve identification part number (sequenced numerically) and find the service part number in the adjacent column.

For example:

The service part number for EGR valve identified D3TE 9D473-AA, D5ZE 9D473-A2A, D7ZE 9D473-A1A, D7ZE 9D473-A2A or D5DE 9F454-B1A is D3TZ 9D473-A.

1973/79
TRUCK SERIES 100/500

9D473 VALVE ASSY. (EXHAUST GAS RECIRCULATION VACUUM CONTROL)—Also refer to groups 8A564,12A091

HOW TO FIND EGR VALVES

To select the correct EGR valve the following information must be H

- Year
- Model (F100,F150,F250, etc.)
- Engine (6cyl. 4.9L-300 C.I.D., 8cyl. 5.0L-302 C.I.D., etc.)
- Transmission (manual, automatic, etc.)
- Other factors (California, hi-altitude, etc.)
- In some cases, more than one service EGR valve may be specified in the catalog based on the above information. In these cases the identification part number shown on the EGR valve is also required.

For example:

If an EGR valve is required for 1976 F100 with an 8 cyl. 5.9L (360 C.I.D.) engine, automatic transmission, used in Canada and 49 states (except California)

- Refer to 1976 F100
- Read down to find F100-A/T 8 (cyl.) 360 (C.I.D.).

The service part numbers listed for this application are D3TZ 9D473-A and D3OZ 9D473-A. Therefore, to select the correct service part number, the identification part number shown on the EGR valve taken from the vehicle, must be used.

If the EGR identification is D3TE 9D473-AA, D5ZE 9D473-A2A, D7ZE 9D473-A1A, D7ZE 9D473. A2A or D5DE 9F454-B1A the service part number is D3TZ 9D473-A. If the EGR identification is D3OE 9D473-AA, D5OE 9D473-A1A, D5OE 9D473-A2A, D7BE 9D473-A1A, D7BE 9D473-A2A or D5DE 9F454-A1A the service part number is D3OZ 9D473-A.

9D475 VALVE ASSY. (EXHAUST GAS RECIRCULATION)

To select the correct EGR valve by knowing the identification number only:

- Check the EGR valve, taken from the vehicle, for an identification part number.
- Refer to the Identification Chart below.
- Find the EGR valve identification part number (sequenced numerically) and find the service part number in the adjacent column.

For example:

The service part number for EGR valve identified D50E 9D475-A1A or D50E 9D475-A2A is D50Z 9D475-A.

1973/79 TRUCK SERIES 100/500

9D475 VALVE ASSY. (EXHAUST GAS RECIRCULATION)—Also refer to groups 9D448, 9F452

HOW TO FIND EGR VALVES

To select the correct EGR valve the following information must be H

- Year
- Model (F100,F150,F250,etc.)
- Engine (6 cyl. 4.9L-300 C.I.D., 8 cyl. 5.0L-302 C.I.D., etc.)
- Transmission (manual, automatic, etc.)
- Other factors (California, hi-altitude, etc.)
- In some cases, more than one service EGR valve may be specified in the catalog based on the above information. In these cases the identification part number shown on the EGR valve is also required.

For example:

If an EGR valve is required for a 1976 F100 with an 8 cyl. 5.0L (302 C.I.D.) engine, manual transmission.

- Refer to 1976 F100
- Read down to find F100-M/T 8 (cyl.) 302 (C.I.D.).

The service part numbers listed for this application are D50Z 9D475-A and D5TZ 9D475-C. Therefore, to select the correct service part number, the identification part number shown on the EGR valve taken from the vehicle, must be used.

is D50Z 9D475-A. If the EGR identification is D5TE 9D475-C1B or D5TE 9D475-C2B the service part number is D5TZ 9D475-C.

NEW ISSUE

9500-9B509 Refer to group 9510 for Carburetor Parts List Instructions

9510 CARBURETOR ASSY.

HOW TO IDENTIFY CARBURETORS AND RELATED PARTS

To facilitate the identification of service parts for a specific carburetor, parts lists or bills of material are provided in Section 95.19 and up, of this catalog for each carburetor assembly. It is necessary first to identify the carburetor assembly per the instructions that follow.

Carburetors can be identified by the stamping number shown on the carburetor or on a metal tag attached to the carburetor.

Each carburetor for 1973/models has an identification tag. An illustration and explanation of the carburetor identification tags are shown on Page 2 of this section.

If either the tag or stamping identification number is known, the related carburetor and carburetor parts list numbers can be determined from the Chart beginning on Page 2 of this section.

Carburetors and their parts lists can also be identified by Engine, Model Year, etc. in the Carburetor Application Chart beginning on Page 16 of this section. Also shown in the Carburetor Application Chart is the page number for a typical parts illustration for each carburetor assembly.

Carburetor illustrations are shown in Illustration Section 95 of Form FP-8096-B.

Parts lists are grouped by type and engine and each group of related carburetor parts lists is shown in a separate section. The section number can readily be identified with the carburetor parts list number as shown in the following example:

| Carburetor Type | Engine No. of Cyls. | Engine C.I.D. | Parts List Number | Catalog Section No. |
|-----------------|---------------------|---------------|-------------------|---------------------|
| Carter 1/B | 6 | 240,300 | 33A,33B,33C,etc | 95.33 |
| Ford 2/B | 8 | 302 | 29A,29B,29C, etc. | 95.29 |
| Ford 2/B | 8 | 360,390 | 30A,30B,30C, etc. | 95.30 |

For ready reference, kit part numbers are shown with the carburetor identification guide.

A listing of components for each kit is shown in Section 95A.

Refer to the Index at the beginning of Section 95A for page number of service kit.

Carburetor attaching parts are shown at the beginning of their respective parts lists,

To identify the parts for a specific carburetor it is only necessary to refer to the related parts list and parts illustration.

An Alphabetical Index showing a cross-reference between noun description and Basic Group number is located at the beginning of this catalog.

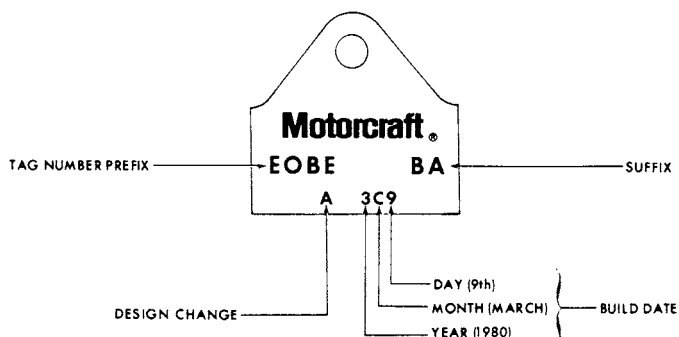

**IMPORTANT: ALWAYS FURNISH APPROPRIATE WARRANTY PLATE INFORMATION and DSO NUMBER
IF APPLICABLE WHEN ORDERING PARTS NOT LISTED IN THE CATALOG.**
