TRUCK SERIES 100/500****SYMBOLS COMMONLY USED IN THIS CATALOG**

The following symbols appearing on revised pages are to be interpreted as follows:

- * Indicates Motorcraft Sales Part Number.
- # Indicates some form of identification such as part number, stamping, paint stripes and tags.
- ★ Symbol indicates part is not supplied for service for the following reasons:
 - a. Part is superseded and replaced as indicated in the description column of text.
 - b. Part can be improvised as indicated in the description column of text.
 - c. Due to its function there would be little or no demand.

NOTE - ALWAYS REFER TO THE DESCRIPTION COLUMN OF THE TEXT FOR POSSIBLE SUBSTITUTION, OR FOR MATERIAL SPECIFICATIONS AND DIMENSIONS WHICH MAY BE HELPFUL IN OBTAINING THE NON-SERVICED PART LOCALLY.

GENERAL INSTRUCTIONS

This Ford Truck Master Parts Catalog contains replacement parts and accessories information for Truck Series B500, E100/350, F100/500, M450/500, P350/500 and American Road Camper for model years 1973/ on U.S. and Canadian built vehicles. Unique Canadian part numbers and applications have been identified by a symbol (♣) and footnoted. Unique U.S. part numbers and applications have been identified by a symbol (☆) and footnoted. Use this Text Catalog in conjunction with Illustrations Catalog Form FPS 8096-B.

Refer to the Index on Page 1 for a listing of the items appearing in the General Information Section.

HOW TO USE THIS CATALOG

There are three ways of finding part numbers.

1. By Part Name
2. By Illustration
3. By Identification

Should an inquiry be received for a radiator grille for a 1973 F100 -

BY PART NAME -

- A. Refer to the Chassis Parts Alphabetical Index.
- B. Refer to the alphabetical nomenclature and find the part name "Grille (radiator)". The group number listed is 8200.
- C. Refer to group number 8200 and locate 1973 in the "YEAR" column. Find the series F100/350 in the "MODEL/RESTRICTIONS" column.
- D. The part number shown is D6TZ 8200-A.

BY ILLUSTRATION -

- A. Refer to the Illustrations Catalog (Form FPS 8096-B) to the tabbed divider marked "COOLING-GRILLE".
 - B. Refer to the index immediately behind the divider and find the illustration titles for the 1973 F Series.
 - C. Under the heading "RADIATOR GRILLE and RELATED PARTS" find the illustration for the 1973 F100.
 - D. Refer to the illustration designated (on page 2 of Illustration Section 82) and find the group number for the grille to be 8200.
 - E. Refer to group number 8200 in this catalog and locate 1973 in the "YEAR" column. Find the series F100/350 in the "MODEL/RESTRICTIONS" column.
 - F. The part number shown is D6TZ 8200-A.

BY IDENTIFICATION -

Certain parts and most major assemblies are identified with a part number shown on an attached tag or plate or on the part itself. Reference to identification numbers is made throughout the catalog and cross reference charts are included in some sections to provide immediate knowledge of the service part number when the identification number is known. All identification information other than charts will be preceded by the symbol (#).

IMPORTANT - Identification tags and plates must be retained with the part or assembly with which they are originally supplied.

R.H. and L.H. PARTS

The driver's side is the left hand side of the vehicle and determines whether such parts as fenders, lamps, etc. are right or left hand.

Most Right Hand and Left Hand parts are listed in adjacent columns as shown in the following examples:

| YEAR | MODEL/RESTRICTIONS | PART NUMBER | | DESCRIPTION | QTY. |
|-------|--------------------|---------------------|---------------------|-------------|------|
| 73/76 | F100/350 | (RH) D3TZ 1020124-B | (LH) D3TZ 1020125-B | | 1 |
| 73/76 | F500 | (RH) D3TZ 5020124-B | (LH) D3TZ 5020125-B | | 1 |
| | | | | | |

MOTORCRAFT SALES PART NUMBERS

To facilitate the stocking and handling of those service parts which are assigned both service part numbers and Motorcraft Sales Part Numbers, the Motorcraft Sales Part Numbers are preceded by an asterisk (*) and are usually located at the beginning of the description column.

For example, refer to Section 96, group 9601. The service part number for a carburetor air cleaner element used on a 1973 F100 with an 8 cyl. 302 C.I.D. engine is D2AZ 9601-A and the Motorcraft Sales Part Number is FA-97. In the catalog this item will be shown as D2AZ 9601-A *FA-97.

| YEAR | MODEL/RESTRICTIONS | ENGINE | | PART NUMBER | DESCRIPTION | QTY. |
|------|--------------------|--------|--------|-------------|--|------|
| | | CYL. | C.I.D. | | | |
| 73/ | E100/350, F100 | 8 | 302 | D2AZ 9601-A | *FA-97-#D2AF 9601-AA-9 1/32" I.D. x 11 17/64" O.D. x 2 5/8" high-use with D2AZ 9600-B, D3UZ 9600-B, D4AZ 9600-A, D4UZ 9600-A | 1 |
| | | | | | | |

FORMATS

Various formats are used throughout this catalog to coincide with the normal procedure for selecting the affected part numbers. Most areas of the catalog use a format arranged in the order shown below:

Column -

1. Model year.
2. Type of vehicle or equipment within a specific model year.
3. Complete part number.
4. Description, size, etc.
5. Quantity required per vehicle

Formats peculiar to a particular area of the catalog are generally self explanatory. When necessary, instructions are shown at the beginning of the affected group. For instance, the various charts and parts list method of cataloging in the Carburetor Section are explained on Page 1 of Section 95.

EXHAUST SYSTEMS CERTIFICATION

"For their intended application as specified in this catalog, the exhaust system parts and systems listed for sale have been certified to be in compliance with the requirements of the rules of the Florida Department of Environmental Regulation (Chapter 17-18, Part III of the Florida Administrative Code), and the regulations of the California Highway Patrol (Chapter 2, Part 1052) for exhaust system certification."

EXPLANATION OF THE FORD PART NUMBERING SYSTEM

For greater convenience this catalog is divided into specific sections; such as brakes, front suspension, engine, transmission, etc. For example, FRONT AXLES appear in Section 30, STEERING WHEELS in Section 36, REAR AXLE in Section 40, etc. The applicable exploded illustrations are contained in separate sections which are related to the Text Sections numbers. For example, STEERING WHEEL illustrations appear in Illustration Section 36 of the "Illustrations" Catalog, Form FPS 8096-B.

The part number groups, part names and the section numbers under which each is listed are shown on pages 5, 6 and 7 of the General Information Section.

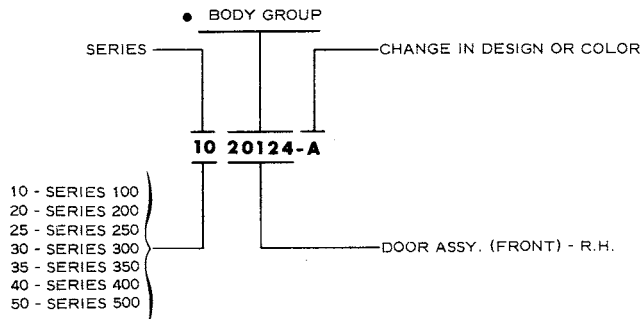

In numerical listings, expanded group numbers will be considered to follow the same sequence as the regular group numbers from which they are expanded and are arranged in Catalogs as follows:

**3538
3C538
3634
3A634**

Illustrations contain group numbers only, therefore, it is necessary to refer to the group within the TEXT portion of the catalog for complete applicable part numbers.

1973/79 TRUCK SERIES 100/500

GENERAL
INFORMATION

11

MODEL YEAR APPLICATION

Model year application is indicated by showing the first year followed by a diagonal line to indicate continued usage in all subsequent years until the insertion of the last year of usage, which will then be inserted after the diagonal line. If no diagonal line is shown, the part is applicable only to the year indicated.

Example:

- 73/ Indicates part used 1973 through subsequent models.
- 73/74 Indicates part used 1973 through 1974 model years.
- 73 Indicates part used 1973 model year only.

MODEL CODES

Truck models are listed throughout this catalog by truck series. A listing of model codes shown on warranty plates is included in this section on pages 23 thru 32. Refer to these pages to determine the series listed in the text of the catalog.

Example:

- F100/350 means F100 thru F350 or F100, F150, F250 and F350.
- and: B-F500 means B500 and F500.

SOFT TRIM

Soft Trim parts are arranged in separate sections by model year i.e., 1973, 1974, etc. The 1973 and 1974 sections include facsimile trim swatches and complete trim codes. For a verification of trim color and material for 1975/ refer to the Salesman's Trim and Color Selection Guide. To determine the complete part number of a trim part, it is necessary to know the "Trim Code" which is shown on the Warranty Plate of the vehicle (refer to page 17). Instructions for selecting soft trim parts are contained at the beginning of each Soft Trim Section.

ATTACHING PARTS (NUTS, BOLTS, ETC.) and LOCATOR CODES

Standard and utility hardware, such as bolts, screws, fittings, etc. are listed below the part with which they are used. To facilitate the stocking and handling of standard and utility parts by Ford Dealers, locator codes are preassigned by Ford Motor Company. The locator codes are shown in parentheses immediately following or below the standard and utility part numbers. For example, refer to Body Section 100, group 101B10. The part number for a 3/16" x 13/32" oval head blind rivet is 380334-S and the locator code is (SS-45-H). In the catalog this item will be shown as part number 380334-S with the locator code (SS-45-H) appearing at the beginning of the Description Column. In some charts, such as the Carburetor Parts List Charts in Section 95.19, 95.29, etc. the locator code will be shown next to or below the part number in the Part Number Column.

LIQUID MEASURE

Most liquid measures listed in this catalog are in U.S. sizes and certain other liquid measures (unique to Canada) listed in this catalog are in Canadian sizes. The following chart provides an understanding and a translation of U.S. to Canadian and Canadian to U.S. sizes.

| | <u>1/2 Pint</u> | <u>Pint</u> | <u>Quart</u> | <u>Gallon</u> |
|--------|----------------------|-------------|----------------------|---------------|
| | (CAPACITY IN OUNCES) | | (CAPACITY IN OUNCES) | |
| Canada | 10 | 20 | 40 | 160 |
| U.S. | 8 | 16 | 32 | 128 |

Example - 5 U.S. Quarts (160 ounces) equal 4 Canadian Quarts (160 ounces) or 1 Canadian Gallon

TRUCK SERIES 100/500**

D.S.O., F.S.O., or L.P.O. (SPECIAL ORDERS)

The District Code Number will appear in the D.S.O. space on the Certification Label for all units including regular production. Always furnish appropriate Certification Label information and D.S.O. Number, if applicable, when ordering parts not listed in the catalog. If the unit is D.S.O, F.S.O. or L.P.O. (Special Order), the complete Order Number will appear in the D.S.O. space in addition to the District Code Number.

IMPORTANT - Many parts and assemblies used on these vehicles may be standard or optional on other models. When the assembly number is known check the applicable identification and cross reference charts for possible service parts. If not listed in this catalog order the part on a Special Order basis through your Facing Distribution Center.

HOW TO IDENTIFY 351 C.I.D. ENGINES

The following methods will help to identify the subject engines that are in use:

- Decal on Air Cleaner Cover
- Emission Control Systems Decal on Valve Cover
- 351C was last produced in 1974
- 351M introduced in 1975
- 351W introduced in 1969 in use through 1980

| <u>ITEM</u> | <u>351W</u> | <u>351C & M</u> |
|--|---|--|
| Number of bolts attaching valve cover on exhaust manifold side | 3 | 4 |
| Type of Front Cover | Bolted to Cylinder Block | Cast as part of Cylinder Block |
| Thermostat Housing | Bolts horizontal and mounts to intake manifold | Bolts vertical and mounts to front cover |
| Fuel Pump | Attaching Bolts side by side (horizontal plane) | Attaching Bolts one above the other (vertical plane) |

HOW TO ORDER PARTS

- All except American Road Camper
When ordering parts, always give the complete part number.
In the event the part number is not known, the following information should be included.
 - A. Complete description of part
 - B. Model, year and body type.
 - C. Dimension, number of teeth, size, etc., if possible rough sketch of part.
 - D. If applicable to engine, transmission, axle, steering, etc., specify type, such as 302 C.I.D., Automatic Transmission, Power Steering, etc.
 - E. Advise how shipment is to be made - Freight, Express, Air, Parcel Post.
- American Road Camper, Refer to the R/V General Information Section for complete ordering instructions.

INDUSTRIAL ENGINE and POWER UNIT PARTS

Most of the normal replacement parts for 6 and 8 cylinder Ford industrial engines and power units are carried in Ford Car and Truck Dealers inventory and the 4 cylinder gasoline as well as the 4 and 6 cylinder Diesel parts are carried in Ford Tractor Dealers' stock. To obtain Ford industrial engines and power units as well as parts unique to these units, order direct from authorized Ford Industrial Products Dealers only.

CROSS REFERENCE LIST BETWEEN MANUFACTURERS' and FORD PART NUMBERS

A Cross Reference List to assist in the identification of Ford parts by means of various manufacturers' numbers which are generally known throughout the automotive industry is included in the 1973/ loose leaf and reader transparency catalogs Form FPS 8097-A and FPS 8097-M. This cross reference list includes part numbers for 1964/ truck parts for all truck series for the following manufacturers of parts lines:

E100/300 (1973/74)

To determine Econoline Body Types you must know the body code as well as the model code. For example,
Body code "1" and Series Code "E14" is cataloged as Body Type "89A".

and

Body code "34" and Series Code "E22" is cataloged as Body Type "82B".

The following chart lists the various combinations available and the equivalent body type code.

**BODY TYPE DESCRIPTIONS
(Arranged in Alphabetical Sequence)**

Most body parts and some chassis parts are listed according to Body Type such as 81,83 etc. Body type and trim code information is shown in a 2 digit code for Econoline and a 3 digit code for all Trucks except Econoline.

The body type suffix such as (89)A, (89)B, (89)C etc. is not shown on the Warranty Plate. To determine the specific body type through rating or warranty plate information the model code such as E110, E360 etc. must also be used.

A chart listing the body type codes in conjunction with the related model codes is shown on the preceding pages.

LIQUID MEASURE

Most liquid measures listed in this catalog are in U.S. sizes; however, those measures which are specified for unique Canadian parts are in Imperial or Metric sizes.

The capacity in ounces and litres for both U.S. and Imperial measures are specified below:

| | 1/2 PT. | PINT | QUART | GALLON |
|----------|-------------------|-------------------|------------------|------------------|
| Imperial | 10 oz. (284.1 ml) | 20 oz. (568.2 ml) | 40 oz. (1.136 l) | 160 oz. (4.55 l) |
| U.S. | 8 oz. (236.6 ml) | 16 oz. (478.1 ml) | 32 oz. (.946 l) | 128 oz. (3.78 l) |

HOW to IDENTIFY WHEELS, RIMS, FLANGES and LOCK RINGS

1. Many wheels and rims may be identified by a stamping number. When the stamping number is known, refer to the Chart on Page 1 for the appropriate service part number.
2. When the stamping number is not known, wheels and rims and their related flanges and lock rings may be identified as follows.
 - (a) Determine the type of wheel or rim from the illustration below.
 - (b) Determine the size of the wheel or rim. If this is not known, check the tire size and refer to the Tire Size to Wheel or Rim Size Chart on page 1 of this section. This chart also lists the various truck series on which the tires and their related wheels or rims are used.
 - (c) When the size of the wheel or rim is known, refer to the Wheel, Rim, Flange and Lock Ring Chart (page 4).

HOW TO UTILIZE REAR HUB and DRUM PARTS LIST

1. Determine rear axle capacity of the truck model for which the part is desired.
2. Select appropriate parts list number from the Model Application Chart shown below
3. Refer to Parts List (starting on page 2) for the following items:

| | | | |
|--------|------------------------------------|------|---|
| 1012 | Nut-hub | 1175 | Retainer-rear wheel grease |
| 1107-8 | Bolt-hub | 1239 | Cup-rear wheel outer bearing |
| 1109 | Hub assy.-rear | 1240 | Cone and roller assy.-rear wheel outer bearing |
| 1118-9 | Bolt-hub | 1243 | Cup-rear wheel inner bearing |
| 1120-1 | Nut-hub | 1244 | Cone and roller assy.-rear wheel inner bearing |
| 1124 | Washer-rear wheel bearing nut lock | | |
| 1126 | Drum-rear brake | | |
| 1134-5 | Nut-hub | | |

For dimensions or identification numbers on the above items, refer to the appropriate group

MODEL APPLICATION CHART for REAR HUBS, DRUMS & RELATED PARTS

FRONT BRAKE MODEL APPLICATION CHART

1. Determine truck series and model year.
2. When optional brake sizes are shown, determine brake size. The brake size shown is the inside diameter of the brake drum and the width of the related brake shoe lining.
3. When different axle capacities are shown for the same brake size, determine axle capacity from truck warranty plate code.
4. Refer to affected parts list. Brake component parts lists appear in numerical sequence in this section following the application chart. Brake drums are not included in the parts lists. They are listed in Section 11.1 Front Hub and Drum Parts Lists. Refer to Section 11.1, page 1.
5. Refer to the appropriate section and page of the Truck Illustrations Catalog when necessary for the group numbers of the required parts. Brake components are also listed by part name with their related group number in the Index at the beginning of Section 10.

BULK HOSE and RE-USABLE FITTINGS CHART

1973/ Louisville-built trucks use hoses and re-usable fittings for brake lines. The Chart below may be used to make service replacements for the hoses and fittings.

1. Determine hose I.D. on truck being repaired
2. Find hose I.D. in chart below
3. Follow line containing that hose I.D. across to the right to find part numbers for hose and fittings. (Where more than one fitting is listed on the same line, use the hose adapter chart below to determine fitting needed.)

REAR BRAKE MODEL APPLICATION CHART

1. Determine truck series and model year.
2. When optional brake sizes are shown, determine brake size. The brake size shown is the inside diameter of the brake drum and the width of the related brake shoe lining.
3. When different axle capacities are shown for the same brake size, determine axle capacity from truck warranty plate code.
4. Refer to affected parts list. Brake component parts lists appear in numerical sequence in this section following the application chart. Brake drums are not included in the parts lists. They are listed with the appropriate hub assembly under group 1109 in Section 11.
5. Refer to the appropriate section and page of the Truck Illustrations Catalog when necessary for the basic or group numbers of the required parts. Brake components are also listed by part name with their related basic or group number in the Index at the beginning of Section 10.

BRAKE BOOSTER and RELATED PARTS

This section incl. the following.

| A. Brake Booster Identification Cross-Reference Chart | 2 | D. Model Application Chart | 3 |
| B. Illustration to identify booster types | 1 | E. Brake Booster Components Parts List | 5 |
| C. Bendix brake vacuum booster identification tag | 1 | | |

HOW TO LOCATE BRAKE BOOSTERS and THEIR COMPONENTS

1. Use the Identification Tag
 - a. Ford trucks use Bendix or Midland-Ross boosters and both types have an identification tag carrying the Ford Production number and Manufacturer number. The illustration below shows how booster diameter is measured and shows the location of the identification tag on a Bendix booster.
 - b. Locate the tag or stamped number on the booster and find the Ford number and Manufacturer number. Some Bendix boosters on units below the 500 series do not have a tag, but do have the last 5 digits of the Manufacturer number stamped on the booster. For example, Bendix number 2510466 would have 10466 stamped on booster.
 - c. Use the Identification Cross-Reference Chart on page 2 to translate the Ford number or the Manufacturer number into a Service Part number for the booster or booster repair kit.
 - d. For component parts other than the booster (2005), or major repair kit (2309), refer to the Parts List shown on the chart. These Parts Lists start on page 4.

2. Use the Model Application
 - a. Determine the year and model of the truck by de-coding the truck warranty plate from the General Information Section of this Catalog.
 - b. Determine whether the unit has single brake system (single fluid reservoir in brake master cylinder) or split brake system (two fluid reservoirs in brake master cylinder).
 - c. Use the Model Application Chart, starting on page 3 to determine the service part number of the booster needed.
 - d. For the repair kit (2309) and other component parts, it is necessary to know the Ford Production number or Manufacturer number from the tag on the booster.
 - e. For the major repair kit (2309), obtain the Ford Production number or Manufacturer number from the booster tag, and then determine the service part number of the (2309) kit in the Identification Cross-Reference chart below.
 - f. For the booster components other than the repair kit (2309), obtain the Ford Production number or Manufacturer number from the booster tag, and then determine the parts list for these parts from the Identification Cross-Reference Chart below. Turn to the Parts Lists starting on page 4 and select the part needed.

HOW TO LOCATE BRAKE MASTER CYLINDER and REPAIR KIT

1. Use the Model Application
 - a. Determine the year and model of the truck by de-coding the Truck Warranty Plate from the General Information Section of this Catalog.
 - b. Determine whether the unit has a single brake system (single fluid reservoir in brake master cylinder) or split brake system (two fluid reservoirs in brake master cylinder).
 - c. Use the Model Application Chart, starting on page 3 to determine the service part number of the brake master cylinder needed.
 - d. The repair kit (2004) is listed in the Model Application Chart directly below the service master cylinder.
 - e. Component parts of the brake master cylinder such as cover (2162), gasket (2167), etc. will be found under their respective groups in this Catalog.

1973/79 TRUCK SERIES 100/500

This section includes replacement parts for transmission-mounted parking brakes and cable-operated parking brakes.

HOW TO USE PARKING BRAKE PARTS LISTS

1. Find the truck model in the parking brake application chart below.
2. Locate (in the chart below) the transmission used on the unit being repaired.
3. Determine the size parking brake used on the truck (where necessary);
4. Determine the year (and/or serial number) of the truck.
5. Read across to find the Parts List number in which the brake parts are listed;
6. Turn to the Parts List and select the part needed. (Parts Lists start on page 3)

Example: B500
 Example: 5 speed Clark 282V-
 shown in chart as "5C280 series")
 (Example: 9" x 3")
 (Example: 1973 S35,043)
 (Example: 13A)

HOW TO FIND FRONT AXLE NUMBERS

1. Use the Cross Reference Guides below to find the parts list which contains service parts for that axle.
2. Refer to the Front Axle Model application chart on page 3 to determine the front axle parts list.
3. Refer to Warranty Plate for Front Axle Code or G.V.W.
4. If the basic number is not known, refer to the illustration listed or to the alphabetical index located in the front of this catalog.

3504 GEAR ASSY. (STEERING)

A. HOW TO FIND COMPLETE STEERING GEAR ASSEMBLY PART NUMBER

1. Using the Identification Tag—
Refer to the "Identification" column in the model application chart to find the correct service part number.
2. Using Truck Series and year—
Refer to model application chart to find the correct steering gear.

B. HOW TO FIND THE PART NUMBER FOR A COMPONENT PART OF A STEERING GEAR

1. Use one of the methods explained above to determine the part number of the steering gear assy. (3504).
2. Find the parts list number for that steering gear in the model application chart.
3. Turn to the Parts List (starting on page 2) and find the component needed.
4. Refer to basic group numbers for physical identification where applicable. (Sample: See chart in Group 3548)

MODEL APPLICATION CHART

All power steering hoses are listed under basic number 3A719. The description column indicates functions of the parts.
 Notes: Δ Improvise from bulk hose D0HZ 3B719-A and attach with 8287 clamps. \bullet Includes hoses, tubes and connector assy.
 $@$ Cut to required length from C7AZ 3A005-A (3/8" I.D.-5/8" O.D.) bulk hose and use 8287 clamps.
 \blacksquare Cut rubber hose portion to req'd. length for 8 cyl.

3A674 PUMP ASSY. (POWER STEERING)

A. HOW TO FIND COMPLETE POWER STEERING PUMP ASSEMBLY PART NUMBER

1. Using the Identification Tag—
Refer to the "Identification" column in the model application chart to find the correct service part number.
2. Using Truck Series and year—
Refer to model application chart to find the correct power steering pump.

B. HOW TO FIND THE PART NUMBER FOR A COMPONENT PART OF A POWER STEERING PUMP

1. Use one of the methods explained above to determine the part number of the power steering pump assy. (3A674)
2. Find the parts list number for that power steering pump in the model application chart.
3. Turn to the Parts List (starting on page 2) and find the component needed.

REAR AXLES and RELATED PARTS

HOW TO IDENTIFY REAR AXLE PARTS.

1. BY USING THE WARRANTY PLATE CODE.

Refer to page 5 of this section. Codes are arranged in alphabetical and numerical sequence.

2. BY USING THE APPLICATION CHART

Refer to page 7 of this section.

3. BY USING THE AXLE TAG or DIFFERENTIAL CARRIER IDENTIFICATION NUMBER.

Refer to page 8 of this section. Illustrations showing the location of identification numbers (stampings and tags) appear on pages 3 and 4 of this section.

4. BY USING REAR AXLE ILLUSTRATIONS.

- a. Parts illustrations for rear axle components are published in Illustration Section 40 of the Truck Illustrations Catalog, Form FP 8096-B. For appropriate page number, see the Index at the beginning of Illustration Section 40 or refer to Truck Rear Axle Application Chart on page 7 of this section.
- b. Find the basic group number from the illustration.
- c. Use one of the methods above to determine the rear axle parts list number in Section 40.1.
- d. Refer to the group in the catalog. Determine the part number needed from that group or follow cross-references to other groups to determine the part number needed.

5. BY USING THE ALPHABETICAL INDEX.

- a. An index listed alphabetically by part name showing the related basic or group number for rear axle parts is located at the beginning of this catalog.
- b. Use the index to find the group number of the part.
- c. Use one of the methods above to determine the rear axle parts list number in Section 40.1.
- d. Turn to the proper parts list and select the part in the group desired.

6. BY USING CHARTS SHOWING DIMENSIONS or MARKINGS.

Refer to basic groups 4209, 4234, 4851 and 4859 in Sections 41 and 48 to identify these parts.

4 WHEEL DRIVE FRONT AXLES

Parts lists and appropriate information for identifying the parts lists for 4 Wheel Drive Front Axles are included in Section 30, page 1.

REAR AXLE SECTION ARRANGEMENT

The sections in the rear axle area are arranged in the following order: 40, 40.1 and 41.

Select the appropriate parts list number by using one of the above methods.

Refer to the affected parts list in Section 40.1 and determine part number of required parts.

When available, complete Rear Axle Assemblies and Differential Carrier Assemblies are listed on pages 15 thru 27 of this section.

REAR AXLE IDENTIFICATION NUMBER LOCATIONS

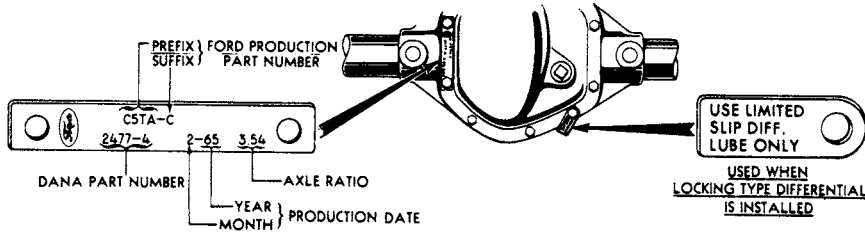

Identification tags are provided on Ford and Dana (Spicer) axles to help locate service parts. For Eaton axles, use identification numbers on the carrier or housing to help locate parts. Refer to page 8 of this section for a cross-reference from identification numbers to axle parts lists.

REAR AXLE WARRANTY PLATE CODE

For instructions on the use of the warranty plate codes, also for other methods of identifying rear axle parts and assemblies, refer to page 1.

If complete Axle Assembly or Differential Assembly is desired, find the Parts List Number in the differential carrier and rear axle identification chart page 8, then refer to page 15 of this section.

REAR AXLE and DIFFERENTIAL CARRIER ASSEMBLIES

Rear axle and differential carrier assemblies, although not normally stocked as service items, may be obtained from the nearest assembly plant when used in current production. Order through your local parts distribution center.

The chart which follows is in parts list number sequence. Refer to page 1 for information to identify rear axle and differential carrier assemblies by:

1. Warranty Plate Code. Page 5
2. Truck Series. Page 7
3. Differential Carrier or Axle Tag Identification. . . Pages 8 and 14

The rear axle assemblies vary as follows.

- 4001 - incl. brakes, hubs, drums and shafts
- 4004 - incl. brakes and shafts, less hubs and drums
- 4005 - incl. shafts, less brakes, hubs and drums
- 4006 - less brakes, hubs, drums and shafts
- 4200 - less brakes, hubs, drums, shafts and housing

HOW TO LOCATE DRIVE LINE PART NUMBERS

1. USE THE DRIVE LINE IDENTIFICATION CROSS REFERENCE GUIDE.

Refer to Page 3 of this section for a Cross-Reference from stamped number on shaft to service part number.
2. USE THE DRIVESHAFT APPLICATION CHART.
 - a. Refer to Section 46.2 Page 1 for the Driveshaft Application Chart Index.
 - b. Universal joint, slip yoke and flange yoke codes used throughout the chart are cross-referenced to service part numbers on page 1 of this section.
 - c. Manufacturer Codes used throughout the Chart are Cross-Referenced as follows:
D-Dana (Spicer) E-Eaton F-Ford R-Rockwell (Timken)
 - d. The Driveshaft "Types", and the "A" and "B" designations are illustrated on Page 10 of this section.
Basic 4605 applies to the driveshaft only as shown on page 10 of this section.
Basic 4602 is a shaft assembly and includes the shaft, universal joints and the slip yoke.
 - e. Typical drive line and universal joint illustrations are shown on page 10 of this section.
3. USE THE DRIVE and COUPLING SHAFT COMPONENT PARTS LISTS.
Use the Drive and Coupling Shaft Component Parts List. When the part number for the complete shaft assembly is known, the part number of the shaft sub-assembly and related components may be found in the Drive and Coupling Shaft Component Parts List in Section 46.1A.
4. USE THE DRIVE LINE ILLUSTRATIONS.
 - a. Refer to the "Typical" drive line illustrations on page 10 of this section to obtain a basic Group Number.
 - b. Refer to the group number in the catalog. Determine the part number needed from that group or follow cross-references to their groups to determine the part number needed.
5. USE THE ALPHABETICAL INDEX.
 - a. Refer to the alphabetical part name index at the beginning of the catalog to obtain a basic group number.
 - b. Refer to the group number in the catalog. Determine the part number needed from that group or follow cross-references to other groups to determine the part number needed.

This Section cross-references driveshaft and coupling shaft assemblies to optional component parts. To locate optional component parts do the following:

1. Find the shaft assembly number as shown in the Driveline Cross-Reference Guide Section 46.1, Page 3 or the appropriate Shaft Application Chart.
2. Refer to the known Complete Shaft Assembly number below for the appropriate Shaft Sub-assembly and related components.

**4816-7 SHAFT ASSY. (COUPLING)
HOW TO LOCATE COUPLING SHAFT PART NUMBERS**

1. USE THE DRIVE LINE IDENTIFICATION CROSS-REFERENCE GUIDE
 - a. Refer to Section 46.1, page 3 for a Cross-Reference from stamped numbers on shaft to service part numbers.
2. USE THE COUPLING SHAFT APPLICATION CHART
 - a. Refer to Section 48.2, page 1 for the Coupling Shaft Application Chart Index.
 - b. Manufacturer codes used in the rear axle column are Cross-Referenced as follows:
D-Dana (Spicer) E-Eaton F-Ford R-Rockwell (Timken)
3. USE THE DRIVE and COUPLING SHAFT COMPONENT PARTS LIST
 - a. When the part number for the complete shaft assembly is known, the part number of the shaft sub-assembly and related components may be found in the Drive and Coupling Shaft Component Parts List in Section 46.1A.

4. COUPLING SHAFT PARTS LISTS
 - a. Coupling Shaft Related Parts are shown in Parts List Form in Section 48.3. Refer to steps 1 and 2 to determine the appropriate parts list number.
 - b. Coupling Shaft Parts Lists include the following items:

| | | | | | |
|------|-----------------|------|------------------------|------|--------------------------------|
| 4635 | Universal joint | 4818 | Retainer | 4840 | Bearing coupling shaft support |
| 4805 | Bearing baffle | 4826 | Bearing sleeve | 4841 | Slip yoke |
| 4808 | Center support | 4835 | Support bearing collar | 4865 | Flange rear u/joint |
| | | | | 4866 | Flange yoke |

Universal joints (4635), slip yokes (4841), flanges rear u-joint (4865) and flange yokes (4866) are also listed under their respective group numbers by type and size.

- c. Coupling shaft support plates (4831) are listed by code number with the related part number. For code to service number cross-reference refer to the Cross-Reference chart below. To determine the appropriate part number of a support plate, refer to the Coupling Shaft Application Chart on page 1 of Section 48.2.
 - d. Coupling Shaft "Types", and the "A" and "B" designations are illustrated on page 2 of this section. Group 4816 applies to the Coupling Shaft only as shown on page 2 of this section.
5. USE THE DRIVE LINE ILLUSTRATIONS
 - a. Refer to the "Typical" drive line illustrations on page 7 of Section 46.1 to obtain a group number.
 - b. Refer to the group number in the catalog. Determine the part numbers needed from that group or follow cross-references to other groups to determine the part numbers needed.
6. USE THE ALPHABETICAL INDEX
 - a. Refer to the alphabetical part name index at the beginning of this catalog to obtain a group number.
 - b. Refer to the group number in the catalog. Determine the part number needed from that group or follow cross-references to other groups to determine the part numbers needed.
